IMPORTANT TIPS TO CONSUMERS

- Switch off lights and electrical appliances when not in use.
- Make maximum use of sunlight, it is free. Avoid use of artificial light during day time.
- LED lights consume less electricity, give more light and have longer life.
- Use BEE 5 star rated Air conditioners, fans, refrigerators etc., to consume less electricity and reduce monthly bill.
- Don't keep refrigerator door open unnecessarily.
- Avoid use of decorative and concealed lighting.
- Use coolers and air conditioner sparingly.
- Turn off all lights other than security lights when building is not occupied.
- Use shunt capacitors across motor terminals to reduce KVA charges and also avoid damage to motors.
- Tighten belt and pulley at regular intervals to reduce loss of energy due to 'slip'.
- Match motors to your requirement. Oversized motors lead to waste of energy. Use motors of high efficiency.
- Low resistance foot valves save 10% energy.
- Suction pipes of rigid PVC save 10% energy.
- Match pump sets to head and discharge.
- Use Solar Electricity to reduce energy bill.

iii. For new installations with less than six months' data, the base consumption shall be calculated at a fixed rate of 67 units/kVA for HT installations and 57 units/kW for LT installations. This will be revised once consumption data for six months is available, but any revisions shall only be applicable prospectively and shall not be applicable for past bills.

iv. For existing installations with increased contract demand/sanctioned load, the base consumption for the enhanced load portion will be calculated at 67 units/KVA (HT) and 57 units/KW (LT). This will be added to the previous base consumption to determine the new base consumption, which will be final and not subject to revision, even after six months from the load enhancement date.

v. If there is a reduction in contract demand/sanctioned load, the base consumption will remain unchanged, and no downward revision will be allowed.

C. Terms of the scheme:

i. To ensure transparency, speedy approval, and enhanced customer service for high-value consumers, the Commission directs that each ESCOM shall designate an officer, not below the rank of Superintending Engineer (Ele.), at their Corporate Office. The said officer shall oversee the scheme, resolve disputes, and approve base consumption in respect of the opted consumers, in consultation with respective sub-divisional offices, where the consumer's installation is located.

ii. To opt for the scheme, the new willing consumers must submit a written request to the ESCOM's sub-division office. The sub-division office shall forward the request to the designated officer at the ESCOM's Corporate Office, along with the required data for determining the base consumption. The designated authority shall approve the base consumption expeditiously. The entire process, from submission of request by the consumer to approval, shall not exceed 7 days.

iii. Email communication is recommended for expeditious service between the sub-division office and the Corporate Office, enabling direct communication without adhering to hierarchical protocols.

iv. Opted consumers are allowed an additional 20% of their contract demand or sanctioned load to facilitate effective utilization of the scheme.

v. Any consumption exceeding the base consumption under the scheme shall not be subject to FPPCA, regardless of whether it is recoverable or refundable. Further, ToD Tariff is not applicable to the extent of the energy consumed and billed under the scheme. The ToD Tariff shall be applicable up to the base monthly average consumption, as computed by ESCOMs.

vi. The DERS consumption exceeding the base consumption shall be excluded from the calculation of additional security deposit.

vii. To participate in the scheme, consumers shall relinquish their existing Open Access/Wheeling transactions, if any. They shall provide a written undertaking, confirming their agreement to relinquish these transactions, along with their opt-in request. Scheme participants who choose Open Access/Wheeling transactions during the scheme's tenure will relinquish the benefits of the scheme from the date they switch to Open Access/Wheeling transactions. If they want to rejoin, they'll be treated as new applicants, subject to prevailing terms and conditions.

The existing scheme participants as on the effective date of this Tariff Order shall be exempt from this condition for their previously contracted open access power quantum, as per KERC's clarification (letter No. KERC/B7/14/531 dated 03.08.2021). However, they shall not be eligible for the additional 20% contract demand benefit.

D. Period of the Scheme:

The Commission decides to extend the scheme for FY2025-26 at the discounted rate of Rs.5/- per unit. Regarding continuation of the scheme for further period of FY2026-27 and FY2027-28, the Commission would issue separate orders.

Other Charges/Surcharges:
